Testing : Unit tests - Integration tests - Tests End-to-End (E2E)

Experiences

Perfeo Energy [Web Developer \(Freelance\)](#)

01/12/2025 - 12/02/2026

- Integration and deployment of an open-source CRM on a cloud instance (cloning, server configuration, DNS, and SSL).
- Implementation of a data export feature to PDF and CSV for an existing dashboard developed in Express.js.
- Improvement and modernization of the company's static website using Tailwind CSS (UI, responsive design, visual optimization, CloudFlare).
- Drafting of functional and technical specifications for a future web/mobile application enabling technicians to generate and send real-time service reports to an administration dashboard.

Virtual Marketing Solutions [Web Developer \(internship\)](#)

19/05/2025 - 18/07/2025

- Integrate mockups (Vue.js)
- Develop and modify REST API routes (Laravel)
- Create and modify database models (Laravel)
- Use Git and GitHub for version control and CI/CD (GitHub Actions)

University Diploma of Technology in Computer Science and Business Management

Certifications :

The Linux Foundation

09/2025

Introduction to DevOps and Site Reliability Engineering (SRE)!

Projects:

Events.com

[\(Nest.js - Next.js - Tailwindcss - MongoDB \)](#)

A comprehensive event management platform developed with NestJS and Next.js. This application allows users to view, create, and manage events, while attendees can book and download professional PDF tickets.

GitMemory

[\(Node.js - VScode framework \)](#)

GitMemory is a Visual Studio Code extension designed to help developers track code changes and remind them to commit regularly. It monitors the number of lines modified and functions added in your workspace and alerts you when thresholds are reached.

Communication :

Arabic: Mother tongue

French: Good professional level

English: Good professional level
